

Bow River Skiff

The **Bow River Skiff** is an evolution in drift boat design. Extracting from the best design features of other drift boats, the **Bow River Skiff** is a boat that is easy to row and a pleasure to fish from. Custom built for you, right here in Calgary, you pick your color combination, and get ready to fish for many years from this tough, durable, aluminum design. Starting with the “South Fork Skiff” hull, we have added fly-line friendly features that include: level skid resistant wooden floors, knee braces with stripping baskets, pedestal seats, Bo’s foot release anchor system and anchor nest, and an adjustable split rowers bench seat. Add to this, great storage capacity for all your gear. This boat handles and maneuvers like no other— you might even get a chance to fish when your friends take over the oars!!
